Appendix 2

Post-development Interview

1. Have you tried out the product?

Yes

2. Have you printed something with the product?

Yes

3. If so, did everything work out well?

There was nothing wrong with the STL file, the printer itself however had some limitations.

4. Does the final product fulfill the idea you had at the beginning of the process?

Yeah, it implemented everything I had wanted and some additional features that I hadn't originally thought about

5. Do you think you can easily modify the product to quickly add other features?

I think I could modify it and have some modifications in mind!
